Use of the tables, and a general rule to know if the numbers in this book are truly printed	- -	12

<b>TABLES</b> of the amount or value of any quantity of goods or merchandise from one farthing to twenty shillings, either by the long or short hundred, half hundred, quarter, pound, ounce, ell, or yard, &c. &c.	13
---	----

## Commission or Brokerage tables

Tables of interest at 3,  $3\frac{1}{2}$ , 4,  $4\frac{1}{2}$ , and 5 per cent.

A table of Land measure, shewing how many poles in length and breadth will make an acre

A table shewing the value of an annuity of  $\text{£}1$ . from 1 to 50 years, at 3, 4, 5, and 6 per cent. compound interest

Tables of Expences, income, or wages, from one penny to 10*l*. by the day, week, month, or year

— of foreign and silver coins, rated as bullion

— of half guineas and guineas

A table, whereby may suddenly be known, how many four-pences, two-pences, pence, halfpence, farthings, and half-farthings, are contained in any number of shillings or pounds

— shewing the number of days, from any day in one month to the same in any other

— of buying and selling by the hundred

## Arithmetical tables

Tables of weights and measures

A table of weights allowed in winter and summer in turnpike roads

— shewing the prices of all kinds of Grain by the sack, &c.

THE  
*P R E F A C E.*

---

**T**HE Accuracy with which I have endeavoured to publish the following sheets will, I hope, gain it a favourable acceptance from the public.—Correctness in books of this kind, ought to be the principal object. To this I have been very attentive, and not, I trust, without success.—The man of business will find in this production a most useful companion, and, I am persuaded, it is free from those imperfections which too frequently are complained of in numerical compositions: for other tables begin at one Farthing, and continue no farther than eighteen pence, whereas this continues to two shillings, rising only one farthing at a time; from two shillings to five, at one halfpenny; from five shillings to ten shillings, one penny; from ten shillings to fifteen shillings, three pence; and from fifteen shillings to twenty shillings, six pence.—Also each table contains the great or long hundred, which most goods are bought by; likewise the gross, twelve doz. which gloves, buttons, &c. &c. are bought by; and the wey of cheese, salt, &c. which is 256lb. as usually sold.—At the foot of each page you have also the days in the year, by which you may know your expences or wages; and likewise the feet in a solid rod, being 272.—In short I have added every thing that I thought would be useful to the tradesman and others, and I hope have so far succeeded, as to say with justice, that this book is the completest of its kind ever yet published.

As it may very probably get into the hands of artificers, apprentices, and others, unacquainted with measuring boards, or any regular piece of timber, or brick work, who would be glad to have some knowledge of it, I have for their instruction annexed the following rules and examples.

1. *Of Board or Superficial Measure.*

*Superficial Measure* is that which has length and breadth only, and is measured by the square foot, containing 144 inches, therefore,

RULE, *Multiply the length in inches by the breadth in inches, and divide by 144, the quotient gives the square feet, and the remainder is the square inches.*

1. There is a board 9 feet 6 inches long, and 9 inches wide, what is the content?

*Ans.* 7 feet 18 inches.

*By the Slip Rule.*

Set the breadth of the board (*viz.*) 9 inches, on the *Slip* to the upper 12, next the edge of the rule; then against the length of the board ( $9\frac{1}{2}$  feet) in the same line on the rule you will find 7 feet and half a quarter, or 7 feet 18 inches.

2. How many bricks, 9 inches long and 4 inches wide, will pave a room 15 feet long, and 14 wide.

*Ans.* 840.

Multiply the length 15 by the breadth 14, gives 210 feet; this multiplied by 144, the inches in a foot, give, 30240 square inches; then multiply 9, the length of the brick, by 4, the breadth, gives 36 square inches in one brick: divide therefore 30240 by 36, gives 840, the bricks required.

And thus for any thing of this sort.

2. *Of Timber or Solid Measure.*

In this sort of measure 1728 square inches make 1 foot; because 12 multiplied 12, gives 144 superficial or square inches; and 144 multiplied by 12 gives 1728 solid inches. The common method to measure timber is thus:

With

With the small cord take the round or circumference of the tree, neither in the largest or smallest part, then double the said string into 4 parts, and apply it to any common 2 feet rule, and observe what it measures, for *this* is called the *girt* of the tree; then the rule is, multiply the *girt* by itself (which is called squaring the *girt*) and then multiply the product by the length of the tree in feet, and divide the product by 144, gives the content in square feet, and the remainder is the square inches. Or otherwise, multiply the square of the *girt* by the length in inches, and divide by 1728, gives the content.

1. There is a tree 14 inches clear\* *girt*, and 9 feet long, what is the content.

Here multiply 14, the *girt* by itself (that is 14) and the product is 196, this multiplied by 9, the length gives 1764 feet, which divided by 144, gives 12 feet 36 inches, or  $12\frac{1}{4}$  feet.

*By the Slip Rule.*

Set the length (9) on the slip right against the 12, under the lower part of the slip on the rule (wrote *girt line*) then against the *girt* of the tree (14) on the *girt line*, you will find  $12\frac{1}{4}$  the content, as before.

*Of Tapering Timber.*

If the tree be very long and large at one end, and small at another, you may with marking it with a piece of chalk any where in the middle, or any crooked place, measure it as *two* distinct pieces, in the manner before directed. Or, if it runs straight do thus:

Take the *girt* at *two* different places, neither at the largest nor smallest of all, but as judgment shall direct; then add these *two* *girts* together, and take the half of them for a mean *girt*, and proceed to multiply by the whole length, as before.

\* N. B. The reason why this is called *clear girt*, is because 1 inch is generally allowed for the bark in trees that are pretty large.

*N. B.* This is a common method, but very erroneous; for the right way is to multiply one *girt* by the other, and extract the square root for a mean *girt*.

Thus a tree 20 inches *girt* at one end, and 40 at the other (the mean *Girt* is 30) and 9 feet long, contains, according to the customary method  $56\frac{1}{4}$  feet; but in reality, it contains not quite 50 feet, therefore is  $6\frac{1}{4}$  Feet too much.

### 3. *Of Brick-Work.*

Brick-work is measured by the square rod, that is  $5\frac{1}{2}$  yards, or  $16\frac{1}{2}$  feet squared, that is,  $272\frac{1}{4}$  square feet make *one* square rod of brick-work, at  $1\frac{1}{2}$  brick thick, which is the standard for the thickness of all walls, to which brick-work is reduced. But 272 feet being near enough for common use, it will be sufficient.

**RULE.** Multiply the length of any regular wall of  $1\frac{1}{2}$  brick thick by the height, and divide by 272, gives the content in rods, and the remainder in square feet.

There is a wall 76 feet long, 9 feet high, and  $1\frac{1}{2}$  brick thick, what is the content?

Multiply 76 by 9, and divide by 272, and the quotient gives 2 rods and 140 feet, *viz.* better than  $2\frac{1}{2}$  rods.

#### *By the Slip.*

Set 272 on the slip to the height 9 on the rule above it; then against 76, the length on the slip is rather better than  $2\frac{1}{2}$  on the Rule.

### 4. *Of walls being more or less than $1\frac{1}{2}$ brick thick, to tell the content.*

Having found the content first of all for  $1\frac{1}{2}$  brick thick, say thus; as the half bricks in the standard, *viz.* 3, are to the content at that thickness, so is the  
number

number of half-bricks in the thickness of any wall to the content of the required wall.

*Note.* But as there is some trouble in this, and in some cases it will be very difficult for the learner to come to a true answer at *two* operations, we have here added a table by which a piece of brick-work at any thickness may be done at one operation, by making the following numbers your divisors, *viz.*

Multiply the length of the wall by the height ; then,

For 1	} Bricks thick,	Divide by {	408
1½			272
2			204
2½			163
3			136
3½			116
4			102

Thus the wall in the foregoing example 76 feet long and 9 inches wide, at  $1\frac{1}{2}$  brick thick, is 2 rods and 140 feet ; what is its content at 3 bricks thick ?

Multiply the length by the height as before, and now instead of dividing by 272 divide by 136 (the divisor in the table for 3 bricks thick) and the answer is 5 rods 8 feet. And thus for any thickness, observing well the divisor.

### 5. Of Gauging.

The way to gauge any common square, or square cooler, or oblong square, is thus :

Multiply the length by the breadth in inches, then multiply that product by the depth, and divide by 282, and the quotient gives the content in ale gallons.—If you divide by 2150, it gives the bushels.

Thus a cistern 60 inches long, 50 inches wide, and 40 inches deep, will contain 425 gallons, and about 55 bushels, 3 pecks.

#### 1. Of tubs or round figures.

Take the diameter, then square it (that is, multiply it by itself) and divide the product by 359 for beer, 294 for wine, and 2737 for bushels.

Thus

Thus you will find a tub, whose diameter is 36 inches every where, and 50 inches deep, holds 278 gallons of ale, 294 wine, and  $30\frac{1}{2}$  bushels.

2. *Of tubs whose diameters at the bottom and top are not equal.*

The common way, like measuring timber, is to add both diameters together, and take the half for a mean diameter; though the right way is to multiply both diameters together, and extract the square root for a mean diameter, then proceed as before.

*Of Casks.*

Any common regular cask may be measured thus, provided both the head diameters are nearly equal.

First, square the bung diameter, and then multiply it by 2, to which add the square of the head diameter; then multiply this by the length of the cask, and divide by 1077 for beer, 882 for wine.

Thus you will find a cask, whose bung diameter is 28 inches, the head 25, and length 36 inches, to contain 73 ale and  $89\frac{1}{2}$  wine gallons.

6. *To measure any regular square piece of ground.*

Take a rod pole, viz. a pole of  $5\frac{1}{2}$  yards long, and measure the length of the place or field, and the breadth, which set down in rods; multiply them together, and divide by 160 (the square rods in an acre) gives the content in acres.

Thus if a yard be 18 rods long, and 14 rods wide, it contains 1 acre, 2 roods, and 12 rods.

These examples are sufficient to give the young learner an idea. If indeed he would know more of the true method of mensuration, let him consult the books of arithmetic, in which these things are more fully treated of.

# Forms of Acquittances, Notes, Bills of Exchange, &c.

## Acquittances upon Receipt of MONEY.

*A general receipt.*

**R**ECEIVED March 12, 1792, of Mr. John Smith, the sum of thirty pounds, in full of all demands.

£. 30 0 0

By me, W. T.

*An acquittance proper to be given by a servant, when he receives money for the use of his master.*

RECEIVED March 21, 1792, of Mr. Thomas Brown, nine pounds, six shillings, for the use of my master, Daniel Young, on account.

£. 9 6 0

By me, A. B.

*A receipt or acquittance for rent paid.*

RECEIVED November 16, 1791, of Mr. John Simpson, twenty pounds, for a quarter's rent, due at Michaelmas last,

£. 20 0 0

By me, B. C.

*An acquittance for debt, received of a third hand.*

RECEIVED the first day of March, 1792, of Mr. A. C. by the hands of Mr. C. D. the sum of eight pounds ten shillings, in full, for certain goods, &c. bought by the said A. C. of me, in full of all demands,

£. 8 10 0

By me, W. P.

## PROMISSORY NOTES.

*The form of one payable on demand.*

I promise to pay to A. B. or order, the sum of thirty pounds, on demand, for value received.

Birmingham, February 19, 1792.

£. 30 0 0

B. C.

*The*

*The form of one payable at a certain time.*

Birmingham, 1st of March, 1792.

Twenty-one days after date, I promise to pay to A. B. or his order, the sum of four pounds, for value received.

Witness, S. K.

R. T.

*The indorsements.*

12th March, 1792.

Pay the contents to E. F. of Birmingham, or his Order.

Witness, T. B.

A. B.

N. B. Promissory notes and book debts, if not legally demanded in the space of six years, cannot be recovered by law.

## INLAND BILLS OF EXCHANGE.

*Form of one payable at sight.*

£. 100 0 0

Birmingham, Jan. 1, 1792.

At sight pay Mr. R. B. or order, the sum of one hundred pounds, the value received of B. C. and place it to account, as per advice from

To Mr. A. B. Merchant,  
Bath street, Bristol.

E. D.

*Form of one payable after sight.*

£. 96 12 6

Birmingham, June 1, 1791.

At ten days sight pay Mr. R. S. or order, the sum of ninety-six pounds, twelve shillings, and six-pence, for value received of T. L. and place it to account, as per advice from

To Mr. James Cox, jeweller,  
Hight-street, Liverpool.

W. T.

*Form of one payable after date.*

£. 300 0 0

Birmingham, June 3, 1792.

TWO months after date pay Mr. A. Y. or order. three hundred pounds, value received of G. B. Esq; and place it to account, as per advice from

To Mr. O. M. at the Angel, High-Green, Wolverhampton.

F. T.

*Another at sight.*

£. 2 18 6

Birmingham, April 8, 1792.

AT sight hereof pay Thomas Hurd, or order, two pounds eighteen shillings and six-pence, for value received, as advised,

To William Shepard, Leeds.

Per John Gray.

Foreign

## FOREIGN BILLS OF EXCHANGE.

London, March 10, 1792.

For crowns 600, at usance.

London on } AT usance pay this first bill of exchange to  
 Paris. } C. D. or order, six hundred crowns, for the  
 First bill. } value here received of Sir A. B. and place it to  
 account, as per advice from

To Mr. X. Y. merchant, at Paris.

C. F.

For crowns 600, at usance.

London, April 4, 1792.

Second } AT usance pay this my second of exchange  
 bill. } (my first not paid) to C. D. or order, six hundred  
 crowns, for value received of Sir A. B. and place it to ac-  
 count, as per advice from

To Mr. X. Y. merchant, at Paris.

C. F.

*The following Duties on Bills, Promissory Notes, and Receipts,  
 commenced on the 2d of August, 1791.*

## BILLS or NOTES after Sight or Date.

For £2	and not exceeding	30l.	Six-pence
Above 30	ditto	50	Nine-pence
Above 50	ditto	100	One shilling
Above 100	ditto	200	One shilling and 6d.
Above 200	—	—	Two shillings.

## NOTES to BEARER on DEMAND,

Reissuable after payment where first issued.

For £2	and not exceeding	5l. 5s.	Three-pence
Above 5	ditto	30	Six-pence
Above 30l. &c. the same duties as to the foregoing Notes after date.			

## NOTES to BEARER on DEMAND,

Reissuable after payment at any place.

For £2	and not exceeding	5l. 5s.	Six-pence
Above 5	ditto	30	One shilling

## FOREIGN BILLS OF EXCHANGE,

Viz. Bills drawn in Great Britain upon Foreign Countries.

For £100	—	—	Six-pence
Above 100	and not exceeding	200l.	Nine-pence
Above 200	—	—	One shilling

## R E C E I P T S.

For £2	and under 20	Two-pence
20	and under 50	Four-pence
50	and upwards	Six-pence
For every Receipt in FULL, Six-pence.		

## *The Use of the following TABLES.*

First, upon the Top of every Leaf you will find in every Page, the Price of the Commodity from one Farthing per Ounce, Pound, Yard, Ell, or any other Denomination.

2. Every Page is divided into six Columns or Divisions; in the narrow Columns stand the numbers from 1 to 10000, and in the wide Columns (opposite to every respective Number) is shewn the Value or Amount, what such a Number comes to, according to the Price fixed at the Top or Head of the Page.

### For EXAMPLE,

Suppose you wanted to know what 35 Pounds of Tobacco come to, at 15 Pence 3 Farthings per Pound, or 35 Yards or Ells of any Thing at the same Price.

N. B. Open the Book till you find 15 Pence 3 Farthings on the Top of the Leaf; and looking into the narrow Column for the Number 35, you will find right against it in the wide Column 2l. 5s. 11½d. the Answer.

### *A General Rule to know if the Numbers in this Book are truly printed.*

EXAMPLE. Suppose this Question. At 7 Farthings the Pound, what will 97 Pounds cost?

The Answer, by the Table, will be 14 Shillings, 1 Penny 3 Farthings; and, that this is the true Resolve, it may be thus proved:

		<i>l.</i>	<i>s.</i>	<i>d.</i>	<i>q.</i>
40 }	At that Rate, comes to	0	5	10	0
57 }		0	8	3	3
<hr/>		<hr/>			
97		0	14	1	3

# At One Farthing.

26	6	2	6 $\frac{1}{6}$	53	3	0	3 $\frac{3}{13}$	80	2	0	0
27	5	15	3 $\frac{1}{5}$	54	2	15	10 $\frac{2}{5}$				

Note. Land is measured by the Pole, Perch, or Rod, which is usually 16 Feet and a Half long ; and, according to the Statute, 4 Poles in Breadth and 40 Poles in Length make an Acre, from which is made the above Table.

### How to use the foregoing TABLE.

If you have a Piece of Land or Field, 11 Poles broad, and you desire to know how many Poles in Length will make that an Acre ; against 11 in the first Column, you will find 14 9 0 in the second for the Length.

A TABLE, shewing the present value of an annuity of 1l. (or which is the same, the number of years value which such annuity is worth) from 1 to 50 years absolute, at 3, 4, 5, and 6 per cent. compound interell.

Year	3 per Cent.	4 per Cent.	5 per Cent.	6 per Cent.	Year	3 per Cent.	4 per Cent.	5 per Cent.	6 per Cent.
1	0,97	0,96	0,95	0,94	26	17,88	15,98	14,37	13,—

24	16,94	15,25	13,80	12,55	49	25,5	21,34	18,17	15,71
25	17,41	15,62	14,10	12,78	50	25,73	21,48	18,26	15,76

The use of this table will easily appear as follows. Suppose I wanted to know how much an annuity of 12l. a year will come to in 7 years, allowing 5l. per cent. First find 7 years, and right against it under 5l. per cent. is 5,79l. which is the value of 1l. for 7 years; multiply then 5,79 by 12, and you have 69,48l. that is 69l. 9s. 7d.

NOTE, The value of the decimal parts 48 is thus found: double, or multiply them by 2, it makes 96; then cut off only the right hand figure 6, and the left will be shillings; thus 9 | 6 is 9 shillings and 6 pence; this is near enough, farthings excepted.

*A TABLE of Expences, Income, or Wages, from One Penny to 10l. per day, shewing how much it amounts to per Week, Month, or Year.*

A TABLE, whereby may suddenly be known (without any use of multiplication, save only by adding a cypher or cyphers to the sums contained therein) how many four-pences, two-pences, pence, halfpence, farthings, and half-farthings, are contained in any number of shillings or pounds whatsoever.

Shillings.	4 Pence.	2 Pence.	Pence.	Half-pence.	Farthings.	Half-farthings.
1 contains	3 or	6 or	12 or	24 or	48 or	96
• 2	6	12	24	48	96	192
• 3	9	18	36	72	144	288
• 4	12	24	48	96	192	384
• 5	15	30	60	120	240	480
• 6	18	36	72	144	288	576
• 7	21	42	84	168	336	672
• 8	24	48	96	192	384	768
• 9	27	54	108	216	432	864
• 10 contain	30	60	120	240	480	960
• 11	33	66	132	264	528	1056
• 12	36	72	144	288	576	1152
• 13	39	78	156	312	624	1248
• 14	42	84	168	336	672	1344
• 15	45	90	180	360	720	1440
• 16	48	96	192	384	768	1536
• 17	51	102	204	408	816	1632
• 18	54	108	216	432	864	1728
• 19	57	114	228	456	912	1824
• 20 contain	60	120	240	480	960	1920

By adding one cypher to any number, you may increase the value thereof 10 times; by adding two, 100 times; by adding three, 1000 times; by adding four, 10000 times, &c. As for example: if you add a cypher to 48, which is the number of farthings that are in one shilling, you may know thereby the farthings that are in 10 shillings; if you add two cyphers to 48, you may know the farthings that are in 100 shillings, &c.

*A TABLE, shewing the Number of Days, from any Day in one Month, to the same Day in any other.*

To	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
January	365	31	59	90	120	151	181	212	243	273	304	334
February	334	365	28	59	89	120	150	181	212	242	273	303
March	306	337	365	31	61	92	122	153	184	214	245	275
April	275	306	334	365	30	61	91	122	153	183	214	244
May	245	276	304	335	305	31	61	92	123	153	184	214
June	214	245	273	304	334	365	30	61	92	122	153	183
July	184	215	243	274	304	335	365	31	62	92	123	153
August	153	184	212	243	273	304	334	365	31	61	92	122
September	122	153	181	212	242	273	303	334	365	30	61	91
October	92	123	151	182	212	243	273	304	335	365	31	61
November	61	92	120	151	181	212	242	273	304	334	365	30
December	31	62	90	121	151	182	212	243	274	304	335	365

**EXAMPLE.** How many days are there from the 5th of July, to the 5th of March?

Find July in the first column, towards the left hand, and March at the head of the table, and in the angle of meeting you will find 243, the number of days required.

Note, In Leap Year, if February be included between the days proposed, you must add one day to the number found as above.

## THE USE OF THE TABLE,

HOW TO

Buy and Sell by the Hundred.

**I**F you buy any thing by the *great* or *long-hundred* (reckoning 112 pounds to the hundred) and would know by the *pound* what the *hundred* is valued at, observe the following directions.

### EXAMPLE 1.

If you buy goods at 4 pence 3 farthings the *pound*, look in the table for 4*d.* 3*q.* in the first column, and against it in the second column, you will find 2*l.* 4*s.* 4*d.* And so much at that rate, 112 *pounds* come to.

### EXAMPLE 2.

If 1 hundred weight, or 112 pounds cost 4 pounds, 1 shilling, and 8 pence, to know how much it is by the *pound*, look 4*l.* 1*s.* 8*d.* in the fourth column of the table, and right against it, in the column next the left-hand, you will find 8*d.* 3*q.* And so much, at that rate, it comes to by the *pound*.

Again; if you buy one hundred weight of Goods for 4 pounds, 1 shilling, and 8 Pence, and *retail* it at 10 pence the *pound*, it comes at that rate, to 4*l.* 13*s.* 4*d.* Then take 4*l.* 1*s.* 8*d.* from it, you will find yourself, by the remainder, 11*s.* 8*d.* a gainer, &c.

And in this manner, you may, with much ease, calculate any quantity, according to the true value, in the table of how to buy and sell by the hundred.

# TABLES OF WEIGHTS AND MEASURES.

TROY WEIGHT,		11 do. old Hay; 60lb. 1do. new Hay,
24 Grains, makes one Penny wt.	36 Truffles 1 Load	
20 Penny weights — 1 Ounce	LONG MEASURE.	
12 Ounces — 1 Pound	12 Inches —	1 Foot
AVOIRDUPOISE WEIGHT.		3 Feet — 1 Yard
16 Drams — 1 Ounce	3½ Yards —	1 Pole
16 Ounces — 1 Pound	40 Poles —	1 Furlong
28 Pounds — 1 Quarter	8 Furlongs —	1 Mile
4 Quarters 1 Hundred wt.	LAND MEASURE.	
20 Hundred wt. — 1 Tun	9 Feet —	1 Yard
APOTHECARIES WEIGHT.		30½ Yards — 1 Pole
20 Grains — 1 Scruple	40 Poles —	1 Rood
3 Scruples — 1 Dram	4 Roods —	1 Acre
8 Drams — 1 Ounce	CLOTH MEASURE.	
12 Ounces — 1 Pound	2½ Inches —	1 Nail
WOOL-WEIGHT.		4 Nails — 1 Quarter
7 Pounds — 1 Clove	3 Quarters —	1 Flemish Ell
2 Cloves — 1 Stone	4 Quarters —	1 Yard
2 Stone — 1 Tod	5 Quarters —	1 English Ell
6½ Tod — 1 Wey	6 Quarters —	1 French Ell
2 Weys — 1 Sack	TIME.	
12 Sacks — 1 Last	60 Seconds —	1 Minute
WINE MEASURE.		60 Minutes — 1 Hour
4 Quarts — 1 Gallon	24 Hours —	1 Day
42 Gallons — 1 Tierce	7 Days —	1 Week
63 Gallons — 1 Hoghead	4 Weeks —	1 Month
84 Gallons — 1 Puncheon	365 Days 6 Hours —	1 Year
126 Gallons — 1 Pipe	DRY-MEASURE.	
252 Gallons — 1 Tun	2 Quarts —	1 Pottle
ALE AND BEER-MEASURE.		2 Pottles — 1 Gallon
4 Quarts — 1 Gallon	2 Gallons —	1 Peck
8 Gallons 1 Firkin of Ale	4 Pecks —	1 Bushel
9 Gallons 1 Firkin of Beer	2 Bushels* —	1 Strike
2 Firkins — 1 Kilderkin	8 Bushels —	1 Quarter
2 Kilderkins — 1 Barrel	5 Quarters —	1 Wey
1½ Barrel — 1 Hoghead	2 Weys —	1 Last.
2 Barrels — 1 Puncheon	SOLID-MEASURE.	
3 Barrels — 1 Butt	1728 Inches —	1 Solid Foot
HAY.		27 Feet — 1 Yard or Load.
36 Pounds, 1 Trufs of Straw, 56lb.		

\* In most Counties the BUSHEL and STRIKE are synonymous.

TABLE of WEIGHTS allowed in Winter and Summer on Turnpike Roads

	Summer.		Winter.	
	tons. cwt.		tons. cwt.	
In waggons on rollers 16 inches broad	8	0	7	0
